

TimeFlyer: create gorgeous timelines to convince and educate!

Published on 02/22/07

TimeFlyer is easy-to-use feature-rich software for timeline creation. TimeFlyer is intended for lawyers or other professionals who need to present a sequence of events in time. TimeFlyer offers easy event entry, complete color customization, and an opposing-argument view. Additionally, research notes can be saved with events, and events are searchable & filterable. Print, PDF, and PNG output is supported. Professional quality timelines are quick to produce.

FOR IMMEDIATE RELEASE

A Single Pixel releases TimeFlyer, software for creating convincing and educational timelines.

TimeFlyer is easy-to-use feature-rich software for timeline creation. TimeFlyer is intended for lawyers or other professionals who need to present a sequence of events in time.

TimeFlyer offers easy event entry, complete color customization, and an opposing-argument view. Additionally, research notes can be saved with events, and events are searchable & filterable. Print, PDF, and PNG output is supported.

Professional quality timelines are quick to produce. TimeFlyer requires Mac OS X 10.4 or later.
