

## **MyNature Tree Guide 1.0 released for iPhone**

Published on 06/23/10

MyNature, Inc. today released MyNature Tree Guide 1.0 for iPhone and iPod touch. The app helps identify more than 200 trees commonly found in North America. Search by question and answer to identify a tree, see digital images of leaves, needles, bark, fruit or a profile of each tree featured. Using a series of 15 questions the user answers as many as possible. The app will match the answers against its database for the tree that most closely resembles the answered questions.

North Creek, New York - Announcing that MyNature, Inc., the developers of MyNature Animal Tracks, are excited about launching their newest app, the MyNature Tree Guide. Users can use this app to identify trees, see images of leaves, needles, fruit, bark, illustrated drawing and a profile of each tree.

No other application does what MyNature Trees can do. It makes an educational experience fun in new way. Using a series of 15 questions the user answers as many as possible. The app will match the answers against its database for the tree that most closely resembles the answered questions. You can also use the questions themselves as a broader search by searching for leaf shape, fruit shape, number of needles as well as many other combinations of searchable features a tree may have. Once identified, the user can see photos and range maps or read more to learn about the tree and its growth cycle.

The app can also alert users to which trees they may find in any area in North America. Just enter the state or province initials into the app and hit submit, all the trees featured for that state will be listed. MyNature Trees also includes a place for making notes, which is particularly useful for those who enjoy recording their outdoor discoveries.

Some of the MyNature Tree Guide Features are:

- \* Searchable database containing over 200 trees found in North America
- \* Clearly illustrated leaf drawings showing the prominent features of each trees leaf
- \* Digital images of an actual leaf, some with their Autumn colors
- \* Range maps to reference a trees presence in your location
- \* Full color digital images of a trees fruit or cone
- \* Digital images of a trees bark as well as its profile
- \* Handy ruler to measure and aid in leaf identification
- \* MyNature journal, where you can personally record the trees you've found along with the location, weather conditions or just your own personal thoughts about your day in the field
- \* State Tree quiz
- \* Interesting and fun facts about trees
- \* Scientific names and their meanings and much more

Currently, MyNature Trees features over 200 trees found in North America. MyNature Trees is a fully-loaded, one of a kind app that's great for kids and adults alike. It is the most fun a nature loving person can have while learning.
