

ALXsoftware updates SleepLess to version 2.3

Published on 02/25/07

SleepLess application is used to prevent the computer from going to sleep without changing system settings.

SleepLess application is used to prevent the computer from going to sleep without changing system settings.

And that is not all - features include:

- can disable sleep with lid closed
- Safe Sleep (Hibernate) with one click
- one click activation / deactivation
- menu icon with commands menu
- no processor time waste
