

Temporis 1.0.1 Update Released

Published on 02/26/07

Bartas Technologies updates its easy-to-use timeline tool.

FOR IMMEDIATE RELEASE

Bartas Technologies released today Temporis 1.0.1, an update to the timeline tool. The free update addresses problems with date precision and improves overall performance.

Features include:

- Drag and drop interface allows you to draw and manipulate events directly in the timeline view
- Simple style tools allow you to completely customize the look and feel of the overall timeline as well as individual events
- Auto-arrange feature arranges events in neat order
- Export to PDF or TIFF format

For pricing and additional information visit the Bartas Technologies web site or email contact@bartastechnologies.com.

Temporis Product Information:
