

## **Droffett 1.0.7 Released**

Published on 02/04/08

Limit Point Software announces Droffett 1.0.7. Droffett is a utility which "flattens" a folder, i.e. moves all files which are descendants of it so that they are directly inside it. Moved files may optionally be aggregated into subfolders, based on file extension, when the flattening operation is complete.

### **IMMEDIATE RELEASE**

New York - February 4, 2008 - Limit Point Software announces Droffett 1.0.7. Droffett is a drop application which "flattens" a folder, i.e. moves all files which are descendants of it in the file hierarchy so that they are directly inside it.

Droffett can also be used to aggregate a set of files by extension. This process will place all files with the same extension into a folder named after that extension. Specify this option using the Preferences window.

Droffett is a member of the Limit Point Software Utilities Bundle that consists of a wide array of small task oriented programs: movie and image processing, file management, batch email, web crawling, URL resource downloading, and much more. Register once and own all of them. Upgrades are always free, and new products are always included.

Limit Point Software has produced software exclusively for the Mac community for over ten years. The application areas include web crawling, bulk email, movie processing, document search and much more. A novelty is our collection of "Utility Software" which consists of a bundle of independent small programs which lack feature bloat as each targets a specific task.
