

## **starQuiz Testing Software Upgraded to Version 3.6.8**

Published on 02/19/08

cosmicsoft has released starQuiz 3.6.8, an update to its powerful and user-friendly computerized testing software product. starQuiz allows educators and corporate trainers to create computerized tests and upload them to the Internet, where students can access them from any Internet-connected computer. By automatically grading the tests, starQuiz saves hundreds of hours of work in correcting tests and recording scores. The new release includes significant advances in reliability and ease of use.

### **IMMEDIATE RELEASE**

Hortonville, Wisconsin - February 19, 2008 - cosmicsoft today released starQuiz 3.6.8, an update to its powerful and user-friendly computerized testing software product. The new release includes significant advances in reliability and ease of use.

starQuiz allows educators and corporate trainers to create computerized tests and upload them to the Internet, where students can access them from any Internet-connected computer. By automatically grading the tests, starQuiz saves hundreds of hours of work in correcting tests and recording scores.

Advanced results analysis is easy with tables, graphs, and statistics; scores can even be automatically transferred to a gradebook with just one click.

starQuiz Version 3.6.8 improves speed and reliability. A major update to the companion starQuiz Server brings compatibility with Mac OS X 10.5.2. The release also brings bugfixes in quiz uploads, network quizzes, and text resources.

A free 15-day trial of starQuiz can be downloaded from the cosmicsoft site. A single-user license for starQuiz costs \$40 USD and includes unlimited quiz uploads to the [quiz.cosmicsoft.net](http://quiz.cosmicsoft.net) server.
