

iWatermark 3.11 Released for Mac and Win

Published on 02/21/08

Script Software has updated iWatermark to version 3.11, their incredibly popular watermarking package for Mac OS X and Windows. Combining ease of use with efficiency, beginner and professional photographers alike can use iWatermark to protect their work. Add digital signatures, url, email address or company logo to one, or a 1000 images at a time. Version 3.11 includes many bug fixes and enhancements and is a recommended update for all customers.

IMMEDIATE RELEASE

Kapaa, Hawaii - February 21, 2007 - Script Software has updated iWatermark to version 3.11, their incredibly popular watermarking package for Mac OS X and Windows. Combining ease of use with efficiency, beginner and professional photographers alike can use iWatermark to protect their work.

The latest version has dramatic speed, user interface and other improvements. iWatermark is integrated to work with Photoshop, ACDSee, iPhoto, Cumulus, Portfolio, PhotoStation, iView and other photo organizers.

iWatermark is the worlds No. 1 watermarking application for Mac and Windows. Protect and stylishly copyright all your images in just minutes. Digitally sign your work/photos/graphic/artwork with iWatermark and claim and maintain the recognition you deserve. Build your company brand, by having your company logo on all your images.

"The beauty of iWatermark is its combination of ease of use and functionality. If you've ever wanted to give watermarking a try, or if you're already doing it and you'd welcome a way to do it quickly and easily, iWatermark is an inexpensive and impressive utility. I've yet to see a better solution than Script Software's \$20 iWatermark." Dan Frakes, Macworld 4.5 of 5 mice.

Avoid the surprise of seeing your artwork elsewhere on the web or in an ad. Avoid the conflicts and headaches with plagiarists who claim they didn't know that you created it. Avoid the costly litigation that can be involved after that. Avoid intellectual property squabbles. iWatermark is a simple and easy way to avoid problems.

iWatermark is an essential tool for anyone with a digital camera, professionals and beginners or graphic artist.

Pricing and Availability:

iWatermark 3.11 may be purchased for \$20.00 USD and comes with a fully featured demonstration period.
