

## **Searchware Solutions announces Print Window 4.0.1 for Mac OS X**

Published on 03/18/08

Searchware Solutions is proud to announce Print Window 4.0.1, the latest version of their window printing utility for Mac OS X. Seamlessly integrated with the Mac OS X Finder, Print Window is a simple yet powerful tool to print file/directory listings of the currently selected window or folder, giving users complete control over the way file listings work, what folders are listed and the final printed format. Version 4.0.1 is primarily a bug-fix release, fixing several issues in the 4.0 release.

Papillion, Nebraska - Searchware Solutions is proud to announce Print Window 4.0.1, the latest version of their highly acclaimed Finder window printing utility for Mac OS X. Print Window is a simple yet powerful tool to generate and print file/directory listings of the currently selected window or folder, giving users complete control over the way file listings work, what folders are listed and the final printed format.

Print Window works seamlessly with the Mac OS X Finder. Create and print a file listing directly from the Finder using several different methods, including a contextual menu item, the Dock menu or using a keyboard shortcut. Users have complete control over what files and folders are printed and how those file listings appear.

Version 4.0.1 is a bug-fix release that addresses the following issues:

- \* Fixed an issue where the print dialog would occasionally not appear after clicking the "Print" button in the "Print Options window".
- \* Fixed an issue where a CD Cover listing would print an extra page if the finished listing should have only been one page long.
- \* Fixed an issue where version information for certain applications would not print correctly.

Print Window 4.0.1 is a free update for registered users of Print Window Advanced Edition Version 4.0. Searchware Solutions recommends all users of Print Window 4.0 update to Version 4.0.1.

Print Window is available in two versions: Standard and Advanced. Both versions are available from within the same application. When first installed and launched, Print Window will operate in Advanced mode for 30 days. After 30 days, Print Window will revert to Standard mode until the user purchases a license.

Print Window Advanced allows users to create CD jewel case and DVD case covers from file listings, as well as save them as tab-delimited text and Microsoft Excel files. Advanced users can also generate listings of thumbnails of folders of pictures.

Minimum Requirements:

- \* Mac OS X Version 10.3.9 or higher
- \* Full Tiger and Leopard compatibility
- \* Universal Binary for PowerPC and Intel

Pricing and Availability:

Print Window Standard Edition is free for unlimited use, and is a recommended update for all customers. Print Window Advanced Edition is \$20 USD per user. Volume licensing is available: \$130 for a 10 user/single-site license (a 35% savings) and \$1000 for an Unlimited Worldwide License.
