

Gadget Wrap Debuts: Launches Keyboard Protectors for Apple Keyboards

Published on 04/08/08

Developer of high quality accessory products for Macintosh, iPod, and iPhone, Gadget Wrap, today announced its debut along with its first product offerings, the Gadget Wrap KeySkin Keyboard Protector series for Apple wired and wireless keyboards, as well as MacBook keyboards.

New York, NY - Developer of high quality accessory products for Macintosh, iPod, and iPhone, Gadget Wrap, today announced its debut along with its first product offerings, the Gadget Wrap KeySkin Keyboard Protector series for Apple wired and wireless keyboards, as well as MacBook keyboards.

Each Gadget Wrap KeySkin Keyboard Protector is made from super thin, high quality, durable silicone to ensure it provides keyboards with exceptional protection and a tailor-made fit. Available in a variety of colors, the Gadget Wrap KeySkin Keyboard Protectors help guard and protect against liquid spills, food crumbs, dirt and dust, and other contaminants that can easily damage or destroy a keyboard. What's more, Gadget Wrap KeySkin Keyboard Protectors even help extend keyboard life by reducing normal day-to-day wear and tear.

Gadget Wrap also announced MacBook KeySkin Pro for Adobe Photoshop. The MacBook KeySkin

Pro Keyboard Protectors provide the same exceptional protection as Gadget Wrap KeySkin Keyboard Protectors, but also includes keyboard shortcuts for Adobe Photoshop printed directly on the protector. Providing the best of both worlds, not only is the user's keyboard protected, but no longer do they have to memorize or look up various Photoshop keyboard commands, making work much more efficient and productive.

"We're very excited to be bringing these new product lines to Macintosh customers everywhere, and we're looking forward to following up with equally great products for the iPod and iPhone markets," said Gadget Wrap president, Charleen Becchina. "We've worked really hard to provide super top quality products at superb price points that handily beat our competitors."

Gadget Wrap, Inc. will soon be releasing its own line of high quality products for Apple's wildly popular iPod and iPhone series of products. For complete information on Gadget Wrap, Inc. and its products, visit their website.
