

## **Norrkross Movie updated to version 1.2**

Published on 04/09/08

Norrkross Software is proud to announce version 1.2 of the video editing, compositing and effects application, Norrkross Movie. Norrkross Movie is ideal both for quickly throwing together some video clips to put on YouTube as well as for making an advanced animated multi track movie with precise control over the result. This update improves the audio control, user interface and adds french localization.

Vaxholm, Sweden - Norrkross Software is proud to announce version 1.2 of the video editing, compositing and effects application, Norrkross Movie. Use Norrkross Movie to edit video in multiple layered tracks, add your own movie titles or use the amazing green screen effect to really boost your amateur movie to a whole new level. The beautiful, simple user interface will quickly get you started with little or no training.

Norrkross Movie is ideal both for quickly throwing together some video clips to put on YouTube as well as for making an advanced animated multi track movie with precise control over the result.

New in version 1.2:

- \* Improved audio mixing. Volume can now be keyframed, allowing exact control over time including fade in and outs.
- \* French localization.
- \* Improved video export with new templates.
- \* QuickLook and Spotlight plugins on Leopard.
- \* The timeline now draws movie frames and audio levels.
- \* Online help improved.
- \* Improved stability.

Key features:

(Watch a short video of the key features at their website)

- \* Easily arrange sequences of video clips, still images and sound layers
- \* Real time, non-destructive video effects
- \* Unlimited layers with transparency compositing
- \* Build complex trees of effects using nodal compositing
- \* Animate attributes using key frames
- \* Export to popular formats

We want movie-making to be affordable to everyone so Norrkross Movie is only \$59 USD.
