

## **Dare to be Creative releases Renamer4Mac 3.0 in new interface**

Published on 04/28/08

Dare to be Creative today announced the release of Renamer4Mac 3.0, a batch file renaming utility for Mac OS X Tiger and Leopard. The new version is the first official release since Renamer4Mac's recent acquisition by Dare to be Creative Ltd., and sees Renamer4Mac in a new look designed to improve usability, productivity and efficiency.

Vienna, Austria - Dare to be Creative today announced the release of Renamer4Mac 3.0, a batch file renaming utility for Mac OS X Tiger and Leopard.

Renamer4Mac is a utility application that batch renames large numbers of files using a graphical drag and drop interface. Renamer4Mac supports search & replace renaming, numbering files, and converting between lower, upper and mixed case. Renamer4Mac handles regular expression and case sensitive matching. The new version is the first official release since Renamer4Mac's recent acquisition by Dare to be Creative Ltd., and comes with a brand new user interface designed to improve usability, productivity and efficiency. The new version also adds built-in, automatic self updates to Renamer4Mac.

Under a new flag:

The new version marks the first official release of Renamer4Mac since its recent acquisition by Dare to be Creative Ltd. With the acquisition, Dare to be Creative Ltd. aims to further strengthen its portfolio of Mac OS utilities, which next to Renamer4Mac now includes iArchiver, an archiving and file compression/decompression utility, and iCombiner, a tool to combine multiple images and PDF documents into a single document.

A fresh look:

Renamer4Mac comes with a brand new user interface designed to make renaming large sets of files easier, more productive and more efficient for users. The new interface draws heavily on the interface elements from iArchiver, the archiving and file compression/decompression utility. Renamer4Mac also comes dressed in a new icon designed to blend closer in the MacOS environment.

Automatic self updates:

The new Renamer4Mac version ships with built-in self updates, with which users are automatically informed of the newest releases and given the option to download the latest release with a single button click.

Features:

- \* Batch rename large sets of files with search & replace
- \* Number files with decimal digits, letters, or mixed decimal digits and letter combinations.
- \* Convert file names to uppercase, lowercase or mixed case.
- \* Insert text into and remove text from filenames.
- \* Support for regular expression and case sensitive matching
- \* Saving favorite rename patterns as templates.

Minimum Requirements:

- \* Mac OS X Version 10.4 or higher
- \* Universal Binary for PowerPC and Intel

Pricing and Availability:

Renamer4Mac is \$26 USD, and available as a free download from the Renamer4Mac website. It runs initially in a 10-day trial mode with all features active. This is the first commercial release of Renamer4Mac.
