

## **Free Webinar: Build an Online Registration System with FileMaker**

Published on 05/05/08

FMWebschool will be presenting a Free webinar on creating online registration systems with FileMaker Pro. Online registration systems are extremely popular. In this teaching webinar, attendees will get the opportunity to learn how to create their own online system. All attendees receive the finished website and database files.

Richmond, VA - FMWebschool will be presenting a Free webinar on creating online registration systems with FileMaker Pro. Online registration systems are extremely popular. In this teaching webinar, attendees will get the opportunity to learn how to create their own online system. All attendees receive the finished website and database files.

Are you a FileMaker developer? Would you like to learn more about FileMaker web publishing? This free webinar will demonstrate the power of FileMaker driven websites. Here's how.

One of the most frequently requested solutions we are asked to create are online registration systems. One type of registration system that is extremely popular and requested year round is youth sports and camps.

Whether it be baseball, football, soccer, cheerleading or a summer camp, online registration is a must. In this live webinar we will create a youth registration system from scratch. This will be accomplished in less than one hour.

There will be a question and answer period at the end of the webinar. Here is what you will learn:

- \* How to build an online registration system
- \* How to create a login system, this protects your visitors information allowing them to only see their records
- \* Display a list of available activities
- \* Display a detail view of the selected activity
- \* Display a registration form that can be filled out and submitted
- \* Online payment integration
- \* Printing out a PDF of the registration form

All webinar attendees receive the webinar files for free. This means you receive all of the files we create in this webinar, including the website and the database. Since this site is written with PHP you can easily customize the website for your own needs.

Webinar Dates and Times:

Tuesday May 13, 2008  
10:00 AM - 11 AM EDT  
Register Below

Tuesday May 13, 2008
