

## **Daniel Schwill celebrates the first six months of Tables**

Published on 03/16/07

Castrop-Rauxel, Germany, March 16, 2007 - Daniel Schwill today announced the celebration of the first six month of Tables - the new spreadsheet for Mac OS X - with a present for new and existing customers.

To celebrate the first six month of Tables new customers receive a 25% off by using the coupon code "jubilee" when they purchase a Tables licence from March 15 till March 21. While customers that already purchased a Tables licence before March 15 can win an iPod shuffle in the jubilee drawing. For more information visit [www.x-tables.eu](http://www.x-tables.eu).

Tables enables you to organise and present data very simply. With Tables you can not only organise data but also calculate and compare them, too. Add, sum or multiply numbers or process data by using 118 functions. Data can not only represent numbers but a date or an amount, too. Tables offers extensive options to format the data. Format them as currency, as an amount, as percentage rate, scientifically or with different date formats. Create optical attractive invoices, lists or reports and even add some photos and PDF documents to present your data with great visual impact.

Tables requires Mac OS X "Panther" version 10.3.9 and above and is available for download at [www.x-tables.eu](http://www.x-tables.eu). Tables offers a full functional free 30-day trial. A licence can be purchased from the web-site for 39 EUR (approximately US\$51).

Let's celebrate the first six month of Tables!:
