Lyon, France - Neomobili today is pleased to announce the release and immediate availability of Deskoverly 1.0, an application that adds revolutionary window management features to Mac OS X. Deskoverly provides everything needed to manage Spaces with a visual Space switcher directly available in the Dock. Windows can become sticky in a single click in order to appear in all Spaces. You can do more in less time in the pure Mac aesthetic style.

"Deskoverly adds to Mac OS X amazing new features like compiz-like wobbly windows" said Ric Perdereau from the Neomobili team. "Now, with Deskoverly managing windows and Spaces is a pleasure. You can focus on your work and forget the rest."

Everything is now possible with your windows. They become like gelatin when they are moved. (compiz-like wobbly windows). Windows can be effortlessly minimized to titlebar (windowshading) or made transparent, aligned and resized in a single click. Deskoverly is has been built with efficiency and usability in mind. Operations are quick and efficient.

A full windows list is available and can be activated using both mouse and keyboard. In addition of a full multi-monitor support, Deskoverly is 64 bits ready for increased performances. Deskoverly is also fully customizable and can be totally controlled using configurable hotkeys.

Pricing and availability

Deskoverly 1.0 is available for \$24.99 (19 Euro). A 14 days full featured trial version is also available. More information can be found online.
