

## **Master the Facts Multiplication v4.6 Now Available**

Published on 03/22/07

Master the Facts Multiplication software now updated to include Polish language option along with English, French, German, Italian, and Spanish.

### **FOR IMMEDIATE RELEASE**

Master the Facts Multiplication is a no-nonsense drill and practice program to aide students in learning multiplication facts. This program was created in response to teachers requesting a "non-game" software tool to use in their classrooms to teach multiplication. Students using Master the Facts Multiplication software for as little as 10 minutes a day to practice multiplication skills may demonstrate marked improvement in multiplication skills on quizzes and tests.

Master the Facts Multiplication software is currently used in homes and schools around the world. The latest version, version 4.6, now includes a Polish language option in addition to English, French, German, Italian, and Spanish.
