

Default Folder X 4.0.6 saves column sizes, delivers better compatibility

Published on 06/04/08

St. Clair Software is pleased to announce the release of Default Folder X 4.0.6, which adds a feature to overcome an annoying deficiency in "column view" mode in file dialogs, as well as correcting compatibility issues in our award-winning utility for enhancing Open and Save dialogs.

Blacksburg, VA - St. Clair Software is pleased to announce the release of Default Folder X 4.0.6, which adds a convenient feature and corrects compatibility issues in our award-winning utility for enhancing Open and Save dialogs.

About Default Folder X:

Awarded Macworld Magazine's Editors' Choice Award for Best System Enhancement Utility, Default Folder X makes Open and Save dialogs "work the way they should." It enhances the file dialogs in all Mac OS X applications, making them work as quickly as you do. Custom keyboard shortcuts put your favorite and recent folders at your fingertips. Pop-up menus let you navigate your folders and open Finder windows. Previews and Spotlight comments are there when you need them. Open, save, and get back to work: Default Folder X is workflow for the rest of us.

What's New: Version 4.0.6 now remembers the width of columns in "column view" within your file dialogs. After you make a column in an Open or Save dialog wider to see long filenames, Default Folder X will automatically set columns to that width the next time you use that dialog, saving you the aggravation of resizing columns every time you open or save a file. This free update also resolves compatibility issues with Kodak Preps, Web Confidential, Parallels Desktop, Quark Xpress, and moving back and forth between Intel- and PowerPC-based Macintoshes. Because these fixes may also resolve issues with other applications, we encourage all users to update to version 4.0.6.

Please see the St. Clair Software web site for screenshots, a full change log, and additional feature information.

System Requirements:

Mac OS X 10.4 (Tiger) or 10.5 (Leopard).

Pricing and Availability:

Default Folder X 4.0.3 is a free update for users who purchased a license or upgrade on or after June 1, 2007. The upgrade is \$14.95 USD for users who bought their licenses before that date, and \$34.95 USD for new users.
