

## **Geekbench 2.0.1 Released**

Published on 03/26/07

Primate Labs announces the immediate availability of Geekbench 2.0.1, an update to their popular cross-platform benchmark for Mac OS X and Windows, which adds Rosetta benchmarks for Mac OS X and 64-bit benchmarks for Windows.

### **FOR IMMEDIATE RELEASE**

Primate Labs announces the immediate availability of Geekbench 2.0.1, an update to their popular cross-platform benchmark for Mac OS X and Windows, which adds Rosetta benchmarks for Mac OS X and 64-bit benchmarks for Windows.

Geekbench 2.0.1 includes the following enhancements:

- \* Geekbench for Rosetta, allowing Intel-based Mac users the ability to measure the Rosetta performance of their system.
- \* Geekbench for Windows 64-bit, allowing users with 64-bit Windows system to measure the 64-bit performance of their processor and operating system.
- \* Better handling of user registration details
- \* Other various bug fixes.

Geekbench 2.0.1 costs \$20 to register, and is a free upgrade for all Geekbench 2 users. A trial version with limited functionality is available for download for both Mac OS X and Windows.
