

AssistiveWare announces KeyStrokes 4.1 on-screen keyboard for Mac OS X

Published on 06/25/08

AssistiveWare today announced the release of KeyStrokes 4.1, an important new version of the award-winning on-screen keyboard with multilingual word prediction for Mac users with physical impairments. Version 4.1 is now Universal Binary, offers enhanced compatibility with Spaces, and on Leopard provides automatic layout switching when the user changes the keyboard layout in the Mac OS X Input menu. Also included is a newly released LayoutKitchen 2.1.1 keyboard editor.

Amsterdam - AssistiveWare(R) today announced the release of KeyStrokes(R) 4.1, an important new version of the award-winning on-screen keyboard with multilingual word prediction for Mac users with physical impairments. Version 4.1 is now Universal Binary, offers enhanced compatibility with Spaces, and on Leopard provides automatic layout switching when the user changes the keyboard layout in the Mac OS X Input menu. Also included is a newly released LayoutKitchen 2.1.1 layout editor, which allows users to design their own on-screen keyboards.

KeyStrokes is not only used by Mac users with disabilities, but also by graphic designers who prefer typing with their tablet instead of a physical keyboard and by developers of touch screen kiosks.

KeyStrokes 4.1 requires Mac OS X 10.4 and later. The suggested retail price for KeyStrokes is 249 Euro excluding VAT (299 USD in North America). Registered KeyStrokes 3 users can use the new version, but to use LayoutKitchen and design their own keyboards an upgrade to a KeyStrokes 4 activation code is required.

An upgrade from KeyStrokes 3 to KeyStrokes 4 (including LayoutKitchen) costs 99 euro excluding VAT (129 USD in North America). This upgrade is free for anyone who purchased KeyStrokes 3 in 2007 or 2008.

For more information, fully-functional downloadable demo please consult the product page. For more information contact AssistiveWare directly or one of our distributors such as Origin Instruments Corporation for North America or ordITICE for France.
