

## **Finger Alarm 1.0 for Mac OS X - The Simplest Alarm Clock in the World**

Published on 03/16/11

iLifeTouch today introduces Finger Alarm 1.0 for the Mac App Store. Finger Alarm was designed to be so simple that no explanation is needed for the process of setting up an alarm. So simple that setting an alarm is simply a matter of moving the hands of a clock and letting go. Presto your alarm is set. The cockpit style design allows for a quick overview of the three clocks. The background skins can be changed to create an atmosphere that fits your style.

Victoria, Canada - iLifeTouch is proud to introduce an alarm clock that requires no instructions. So simple that setting an alarm is simply a matter of moving the hands of a clock and letting go. Presto your alarm is set. This simplicity allows Mac users to open a clock that resembles a cockpit set the alarm while completing other tasks on their screen. Finger Alarm is that simple.

Finger Alarm was designed to be so simple that no explanation is needed for the process of setting up an alarm. Simply click on one of the two flanking clocks move the clock hands around, stop where you want your alarm to go off. Let go and the alarm is set. The cockpit style design allows for a quick overview of the three clocks. The background skins can be changed to create an atmosphere that fits your style. The complexity of Finger Alarm is hidden behind the simple clock design. The iLifeTouch team has really focused on making the alarm setting experience just take a matter of seconds.
