

## Freeridecoding announces BurnAgain FS 1.0.2

Published on 07/08/08

Freeridecoding announces BurnAgain FS 1.0.2, a free update of their CD/DVD multisession burning utility for Mac OS X. BurnAgain FS makes it possible to change the content of a data CD or DVD simply using the Finder. The user can re-mount the disk like a hard drive volume and add or remove files, or even edit and change files several times. Disks burned with BurnAgain FS are readable without additional software on all platforms, as well as automatically preserving special Mac file attributes.

Vienna, Austria - Freeridecoding announces BurnAgain FS 1.0.2, a free update of their CD/DVD multisession burning utility for Mac OS X. Like magic, BurnAgain FS re-mounts a data CD or DVD in a writeable way just like a hard drive volume, making it possible to change the content of a data CD or DVD simply using the Finder. At any time the changes can be burned to the media.

The user can re-mount the disk and add or remove files, or even edit and change them. This can be done several times with CDR, CDRW, DVD+RW and DVD-RW disks until the media is full.

Additionally, the title of the disk can be changed prior to each burn as well. Without any additional software, disks burned with BurnAgain FS are readable on all platforms, automatically preserving special Mac file attributes (resource forks). And since BurnAgain FS doesn't erase the disk each time, its much faster.

The update to 1.0.2 fixes an issue affecting some external CD-Writers and brings several other minor improvements and bug fixes.

The update is free for all BurnAgain FS users.

Feature highlights include:

- \* Multiple sessions without multiple volumes
- \* Change the content of your CD/DVD like on a hardisk
- \* Change disk title at each burn
- \* Preserves resource forks
- \* Platform independent format
- \* Usable with CDR
- \* Usable with CDRW, DVD+RW, DVD-RW

Minimum Requirements:

- \* Mac OS X Version 10.5 Leopard or later
- \* Universal Binary for PowerPC and Intel
- \* 2.2 MB Hard Drive space
- \* Apple supported CD/DVD Writer (internal or firewire)

Pricing and Availability:

A single user license is priced at only 15 Euro (\$23 USD). A FamilyPack option (5 users in same household) is available for only Euro 35 (\$53.00 USD). 10 user OfficePacks are available for Euro 120 (\$180 USD).

A full-featured, demo (20 trial burns) is available and a recommended update for all customers. All customers who have purchased BurnAgain DVD since 1st January 2008 get BurnAgain FS for free. Customers who have purchased BurnAgain DVD before 2008 can purchase an upgrade to BurnAgain FS.
