

## Houdah Software iPhone applications: ACTSudoku, ACTCurrency, ACTGratuity

Published on 07/10/08

Houdah Software has released its first 3 applications for iPhone and iPod Touch: ACTSudoku, ACTCurrency and ACTGratuity. With ACTSudoku, Houdah Software brings the popular Sudoku game to the iPhone and the iPod Touch. ACTCurrency is a universal currency converter. It is your ultimate travel companion. ACTGratuity makes appropriate tipping at restaurants a breeze.

Luxembourg, Europe - Houdah Software, makers of HoudahGeo and HoudahSpot, has released its first 3 applications for iPhone and iPod Touch: ACTSudoku, ACTCurrency and ACTGratuity.

ACTSudoku - With ACTSudoku, Houdah Software brings the popular Sudoku game to the iPhone and the iPod Touch.

ACTSudoku allows you to solve 3 levels (easy, medium, hard) of Sudoku games. Its intuitive touch interface allows you to quickly set positive (green) and negative (red) markers to indicate which digits you still deem possible for a given cell. ACTSudoku may help you by blocking digits which are obviously no longer available and by setting positive markers for the remaining ones. You should further narrow down the possible digits by setting negative markers.

Features:

- \* Unlimited Sudoku games (generated games, not variations on stored games)
- \* Intuitive touch interface
- \* Gorgeous graphics
- \* Automatic or manual markers (pencil in)

Priced at \$2.99 USD

ACTCurrency - ACTCurrency is a universal currency converter. It is your ultimate travel companion.

Want to know how much 45 EUR is in USD? Just tap 4 and then 5. There is no step 3: ACTCurrency calculates the converted value as you type. How about 45 USD in EUR? It's the very same 2 taps. Indeed ACTCurrency always performs the conversion both ways. ACTCurrency comes pre-configured with a handful of world currencies.

You may add any number of currencies and update exchange rates as they evolve.

Features:

- \* Calculates as you type
- \* Fast: minimized number of taps
- \* Universal: add or update exchange rates as you travel

Priced at \$0.99 USD

ACTGratuity - ACTGratuity makes appropriate tipping at restaurants a breeze.

ACTGratuity pulls out all the stops by calculating the tip as you enter the billed amount. You just need to push the digits, and ACTGratuity displays tips appropriate for poor (12.5%), OK (15%), good (17.5%) and excellent (20%) service.

Features:

- \* Calculates as you type

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

- \* Calculates 4 levels of tipping to match service quality
- \* Fast: minimized number of taps

Priced at \$0.99 USD
