

TrendyDigital Releases Camera Friendly Waterproof Case for Apple iPad 2

Published on 03/28/11

TrendyDigital Design announces their release of protective cases for the Apple iPad 2: the WaterGuard series; the PadGear Folio Case series and the Dimension series. The WaterGuard enable iPad 2 owners to use the devices while they are in proximity to aqueous environments without fear of damaging their devices. The PadGear and Dimension series, on the other hand, provides ideal portable solutions for iPad2 owner's daily interaction with their favorite gadgets.

Auburndale, Massachusetts - TrendyDigital Design, a subsidiary of MZ Services Inc. announced new line of accessories designed for the Apple iPad 2. The first line-up is the adaptation of their highly successful waterproof case for iPad 2. The front and back cameras of iPad demand accessibility to both lenses while the iPad 2 is inside the waterproof case. WaterGuard waterproof cases have been redesigned to accommodate this camera feature. The transparent, camera-friendly material of the waterproof case yields uncompromising clarity while photos are taken by the iPad 2 while it is housed inside the case.

The PadGear Case for the iPad 2 protects the device from daily wear and scratches. There are two models for this series: The PadGear Lite and the PadGear Plus with Apple wireless keyboard compatible housing and viewing stand. The Dimension series for iPad 2 is a further extension of TrendyDigital' innovative multi-position, multi-orientation viewing platform for the iPad. The Dimension includes both M Series and V Series. The M series use magnet as the attaching mechanism. The V series use industry strength Velcro band as the attaching mechanism.

The WaterGuard Waterproof Case Series features two models: the WaterGuard Lite and the WaterGuard Plus. Both models feature TrendyDigital's original double waterproof sealing closure, press-and-fold seal, and button fasteners. This multi-tier sealing mechanism provides excellent protection when the iPad 2 owners use their gadget in an aqueous environment. Both models are made of camera friendly, transparent material. The photos taken while the iPad 2 is inside the case have the same crispness and clarity as those taken while the iPad is not in a case. There is no resolution compromise for the front or back lenses. In addition, the WaterGuard Plus version has padding for extra bump protection. Furthermore, the padding has been customized for back camera access. The WaterGuard Plus Waterproof Case is the world's first and only waterproof case with padding designed exclusively for the iPad 2.

The PadGear Folio Case for the iPad 2 protects the device from daily wear and scratches. The PadGear case is a folio case that includes storage pockets for pens, business cards or USB Cables. The PadGear Folio case features a fitted form for the iPad 2 in the right compartment. The iPad 2 is anchored via a T structure. All the sockets on the iPad2's side panel are fully accessible. The case is secured via a non-scratch double zipper when the iPad2 is not in use. It is both a convenient and durable solution for housing your iPad 2. For iPad 2 owners who prefer to use the Apple wireless keyboard when using their device, the PadGear Plus Folio provides an ideal solution. This case has side pocket to store the Apple Wireless Keyboard and a support stand. When the user is ready to use the iPad2 with the keyboard, simply take out the keyboard from the side pocket, open up the folio case, put the keyboard inside the folio case side panel, pop up the stand and you are ready to go. This is the only solution in the market place to incorporate both the Apple wireless keyboard and viewing stand for iPad2.

The Dimension case incorporates several original designs elements to accommodate the most natural way for different users to interact with the iPad. From the outset, it looks like

a slim and well-crafted jacket for iPad. The iPad is protected in a frame case at the right side of the jacket. The frame case has openings for all the access points in the iPad. Users can interact with the iPad in this jacket setting. However, if users want to have a more intimate interaction with their device, they can easily separate the frame case from its base cover and hold the frame case at hand and interact with their device through this slim, elegant frame case. When a user is tired of holding the iPad with frame case at hand, the user can easily and securely attach the frame case to its base cover. If stand viewing is desirable, the case can be converted into a viewing stand once the frame case is attached back to its base cover. The viewing stand can be adjusted to different angles so that the most comfortable viewing position can be achieved for different people. If you prefer portrait viewing, the frame case can be attached in portrait orientation. If landscape orientation is what you prefer, the frame case supports this feature as well.

The Dimension line has two variations. The variations differ on how the attachment mechanism is implemented. The M Series use magnets as the attachment mechanism. The thin, durable frame case magnetically attaches to the base cover. The V series use industry strength velcro band as the attaching mechanism. The selected Velcro band has been rigorously tested and provides the optimize hook-and-loop combination for attaching and separating the frame case from the base cover.

"We are excited about the iPad2's release. The rapid growth of tablet computer provides huge opportunity for us to develop new and innovative protection solution. Leveraging from our experience working with other eReader and iPad, we are able to rapidly develop a suite of protective gears for the iPad2" noted Mark Zheng, vice president of sales and marketing. "We would like to provide a broad range of stylish and protective cases when people use their devices in different environments. The WaterGuard Series for the iPad2 are built on our successful waterproof platform for Kindle and iPad and will become one of the "must have" accessories for the iPad2 owner. The PadGear and Dimension series, on the other hand, provides ideal portable solutions for iPad2 owner's daily interaction with their favorite gadgets.
