

VectorDesigner updated to 1.4.0: With User Definable Templates

Published on 07/15/08

VectorDesigner 1.4.0, introduces user definable templates: a template can contain all the elements that are available in a standard VectorDesigner document, such as paper size, units, rulers positions, layers etc. VectorDesigner is the perfect application for vector drawings, diagrams and illustrations, raster image handling, filtering and color correction. Out of the box, it offers everything users need to create professional level vector artwork.

Torino, Italy - TweakerSoft has released VectorDesigner 1.4.0. VectorDesigner 1.4.0, introduces user definable templates: a template can contain all the elements that are available in a standard VectorDesigner document, such as paper size, units, rulers positions, layers etc.

VectorDesigner is the perfect application for vector drawings, diagrams and illustrations, raster image handling, filtering and color correction. Out of the box, it offers everything users need to create professional level vector artwork, such as posters, brochures, stickers, logos, web design, tshirt production and more.

By leveraging the full capabilities of Quartz and CoreImage, VectorDesigner retains the feel of traditional drawing applications and features a wide assortment of tools, including smart shapes, rectangles, ovals, rounded rectangles, polygons, stars, bezier creation and editing, as well as raster to bezier conversion.

Combine shapes using unite, subtraction, xor and intersection boolean tools. Text can be fitted inside a shape or along a path preserving all the text editing capability of Mac OS X. All filters and composition may be applied non-destructively to shapes and images. A particularly useful feature is the integrated flickr browser; search texture and images by tags, or by color and download them directly inside the document.

VectorDesigner Features:

- * Smart Shapes
- * Bezier Creation and Editing
- * Text inside shape
- * Text along Path
- * Layers Support
- * Raster To Vector Conversion
- * Native CoreImage and Quartz Composer Image filters
- * Image adjustment panel
- * Booleans Operations
- * iSight integration
- * Scanner Integration
- * Flickr Browser
- * EPS and PDF import
- * SVG Import (WebKit based)
- * iLife photo Browser
- * QuickLook Support

Minimum Requirements:

- * Mac OS X Version 10.4 or higher
- * Universal Binary for PowerPC & Intel
- * G4, G5 or Intel Processor
- * 900 Mhz or faster
- * 512 MB Memory or higher

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

* 8.9 MB Hard Drive space

Pricing and Availability:

VectorDesigner 1.2.0 is priced at \$69.95 USD for a single-user license. A fully functional demo is available.
