Kedisoft is proud to announce Invoice 3, their scriptable invoicing application for Mac OS X. Designed from scratch to leverage the power and beauty of the Mac OS, Invoice is an easy-to-use, yet full-featured invoice application for the busy SOHO business owner. A complete rewrite of Invoice 2, version 3 offers several new, unique and incredibly useful features, such as color-coded invoices, on-the-fly currency conversion, block-style editing mode, and more.

Izmir, Turkey - Kedisoft is proud to announce Invoice 3, their scriptable invoicing application for Mac OS X. Designed from scratch to leverage the power and beauty of the Mac OS, Invoice is an easy-to-use, yet full-featured invoice application for the busy SOHO business owner.

Version 3 is a complete rewrite of Invoice 2. Among several new, unique and incredibly useful features, Invoice 3 now offers Smart coloring of invoices, which are helpful to see the status of each invoice at a glance. And since Invoice 3 supports full Drag & Drop support, it is much easier to create and arrange invoices or drag elements to them. Invoice 3 has a powerful new 'block' style editing mode; it's easy to edit any aspect of an invoice.

There is also support for Smart Folders, allowing grouping of projects or by customer. Invoice 3 dutifully calculates the balance for each customer, project and smart folder. With the new Payment Control feature, it's easy to keep track of split payments over time. Invoice 3 also offers Simple Inventory control which helps maintain physical goods, such as CD's DVD's and other stock.
