

Celmaro Releases Webbla 1.0 for Mac OS X Leopard

Published on 07/21/08

Celmaro is pleased to announce the immediate availability of Webbla 1.0, a visual bookmark library for Mac OS X Leopard. Webbla creates automatically webpage thumbnails for each bookmark and allows personalizing and organizing them in collections and smart collections. With it's integrated Spotlight and Quick Look support, bookmarks can be found, previewed and accessed without launching Webbla from the Finder.

Mauritius, Pointe aux Canonniers - Celmaro is pleased to announce the immediate availability of Webbla 1.0, a visual bookmark library for Mac OS X Leopard. Webbla creates automatically webpage thumbnails for each added bookmark and display them in a list or icon view. Bookmarks can be personalized with tags, rating and a description and organized in collections and smart collections.

For system wide integration, Webbla offers Spotlight and Quick Look support to find, preview and open websites from the Finder without launching Webbla.

The automatic adjustable website change tracking system allows to check bookmark related websites on changes and marks the corresponding bookmarks as updated.

Webbla imports standard HTML bookmark files from various web browser and allows to exchange bookmarks with other applications by drag and drop.

Feature highlights include:

- * Visual Bookmarks
- * Collections and Smart-Collections
- * Website Change Control
- * Spotlight, Quick Look Support
- * Bookmark Import/Export
- * Instant Search
- * Drag and Drop Support
- * Clear User Interface
- * Automatic Software Update
- * Universal Binary

Minimum Requirements:

- * Mac OS X Version 10.5.0 Leopard or higher
- * Internet connection, broadband recommended

Pricing and Availability:

Webbla 1.0 may be purchased for \$14.95 USD (1-User-license) and offers a limited 15 day trial period. After purchasing customers will be emailed a license file to unlock the application.
