

"Tri 2: Tri Again" -- Now with tri-pedoes!

Published on 04/02/07

The Con-TRI-ption --the innovative tri-gearred contraption-- return-turn-turns in "Tri 2: Tri Again". This "completely three-mastered" update of the oddly challenging game from Day Late & Dollar Short Software offers a new look, native support for Intel-based Macs, musical accompaniment, and enhanced play with the addition of point-tripling "spinners" and deadly "tri-pedoes".

TEMPLE, Texas -- 2 April, 2007 -- Day Late & Dollar Short Software releases "Tri 2: Tri Again", a significant update to its three-themed arcade game featuring the innovative Con-TRI-ption, the tri-gearred contraption that roams a triangular arena capturing gracefully drifting targets and avoiding ricocheting tri-pedoes. The revised game sports a sleeker appearance, new game elements (tri-pedoes and gear-shifting, point-tripling spinners), and, fittingly, the music of a waltz playing in the background.

"Tri 2" is a Universal Binary, running natively on PowerPC- and Intel-based Macs under Mac OS X 10.3.9 or later. Until registered (with single-Mac licenses for US\$13.33 and multi-Mac discounts available) the game displays scores in Trinary Numbers.

"Tri 2" is a free upgrade for purchasers of Tri version 1.x. Contact triupgrade@daylateanddollarshort.com for upgrade information.

RELEASE NOTES
