

Introducing xTime Project 4.6 for Mac OS X

Published on 08/04/08

Project management has never been this easy. app4mac today released xTime Project 4.6, a new update to their project management application for Mac OS X. xTime Project provides all the tools you need for professional project management. xTime Project helps you organize, administer and monitor your tasks so you can spend more time managing your projects and less time learning to use your project management application.

San Jose, CA - app4mac today released xTime Project 4.6, a new update to their project management application for Mac OS X. xTime Project is designed to keep track of tasks and calculate a project's cost. xTime Project provides all the tools you need for professional project management. With xTime Project, creating, tracking and managing your projects will be much easier. In fact, it has never been this easy!

We have made the latest version even more powerful without sacrificing the simple and intuitive interface that helped make xTime Project a success with thousands of users worldwide. Whether your job calls for managing large construction projects, complex media activities or detailed time schedules, xTime Project is the tool you need. It is easy to use and will help you organize, administer and monitor your tasks - allowing you more time to manage your projects and less time to learn how to use project management software.

Because of our seamless integration with Microsoft Project, you will be able to successfully manage even the most complex projects in a fraction of the time it would take you with similar products. In addition, xTime Project delivers beautiful graphics that are sure to impress customers and colleagues. Scheduling and managing projects are not only important in the corporate world. They're essential for successfully achieving anyone's project goals. xTime Project is an easy-to-learn, cost-effective tool that simplifies project scheduling. It is perfect for anyone, regardless of their experience in project management.

System Requirements:

xTime Project 4.6 is now fully optimized for Mac OS X 10.5 Leopard, for PowerPC G4, G5 and Intel processors (Universal binary) and also for iCal, Spotlight, Address Book, Microsoft Project and the new Apple MobileMe service.

Language support:

xTime Project 4.6 is available in English, Simplified Chinese and French.

Pricing and Availability:

To add more than 20 tasks per projects, you need a user license available from \$99 USD. xTime Project is the cheaper project management on Mac OS X. The price includes free unlimited updates/upgrades and free technical support.

app4mac is a market-leading Mac software developer team. We are committed to delivering powerful and innovative software to our customers at competitive prices. app4mac is a subsidiary company of dev4mac. The company was created in 2001 by two twin brothers (yes, two identical guys) with the goal of providing innovative applications for Mac OS X. We at app4mac think it is the most advanced operating system in the world and the easiest to use. We have a great pleasure to build products for OSX and we are committed to creating quality software that will make the Mac even more user-friendly.
