

A New RapidWeaver theme, Acumen Pro offers more control

Published on 08/02/08

Acumen Pro, a new RapidWeaver theme from long time theme developers, seyDoggy, promises to deliver more options and more control to your RapidWeaver web project. Like many other seyDoggy themes for the popular and highly acclaimed RapidWeaver, a web authoring application from Realmac Software, Acumen has many great features such as full color control, width variations, custom header options, sidebar positioning and much more.

Kitchener, Ontario Canada - Acumen Pro, a new RapidWeaver theme from long time developers, seyDoggy, promises to deliver more options and more control to your RapidWeaver web project. Like many other seyDoggy themes for the popular and highly acclaimed RapidWeaver, a web authoring application from Realmac Software, Acumen has many great features such as full color control, width variations, custom header options, sidebar positioning and much more.

However, one of Acumen's greatest and most professional features is probably it's triple layer, split navigation. Like the seyDoggy cataLog Pro theme before it, Acumen Pro allows for 3 tiers of navigation, giving developers extensive and refined control of their sites architecture and how their visitors are moved through the interface.

Acumen Pro is of contemporary design; light enough to be fun, dark enough to be artsy or strict enough to be for business. There is no limit to the color options you can apply to this theme. Acumen is packed full of features such as:

- * Triple split navigation
- * Custom headers, editable with RWMultitool Lite
- * Sidebar position
- * Width variation
- * Turn the logo on or off on a page by page basis
- * Font size
- * Extensive color control, including background
- * More downloadable theme styles

seyDesign is a division of seyDoggy Web and Graphic design and has been in operation developing and distributing cutting edge RapidWeaver themes since 2005. Known for developing the first commercially available theme with split navigation, seyDesign is responsible for continually pushing the limits of RapidWeaver.

Pricing and Availability:

Acumen Pro is available now for \$16.49 CAD at our online RapidWeaver theme store.

We are a small, yet internationally renowned web and graphic design outfit based in Kitchener, Ontario. Having worked with clients across the UK, Los Angeles, New York, Japan... it's safe to say that seyDoggy's work has touched every corner of the globe with an internet connection. We excel in web design, graphic arts, web themes, template design, photography and digital imagery. Through our daughter site, seyDesign.com, we design and sell thousands of RapidWeaver theme designs for the global market. We also offer consulting services for other companies looking to enter the web design industry or who don't want to hire full time staff to manage their own internet or intranet web systems.
