

## Open Door Networks and Project A ship Five New iPhone Applications

Published on 08/07/08

Open Door Networks, Inc. and Project A, Inc. announced today that they have supplemented their current iPhone Web-image browsing application, iEnvision, with five new, category-specific apps. Available immediately from the App store, each of the 99-cent "Envi" apps focuses on one specific iEnvision topic.

Ashland, OR - Open Door Networks, Inc. and Project A, Inc. announced today that they have supplemented their current iPhone Web-image browsing application, iEnvision, with five new, category-specific apps. Available immediately from the App store, each of the 99-cent "Envi" apps focuses on one specific iEnvision topic. For instance "Comic Envi" is a Web-based comic strip and cartoon browser. The new Envi line lets users easily try out a small, specific piece of the iEnvision family, and then upgrade to the full product if they decide they want additional categories or features.

iEnvision, recognized as one of the "Top 10 iPhone apps to show off with," takes advantage of the iPhone's built-in Internet access and high-resolution multi-touch display to organize Web-based images into tap-and-play full-screen automated slideshows, or "Web shows." iEnvision ships with a number of Web show "groups" built in, and users can also add groups and shows of their own favorite categories.

Each product in the "Envi" line contains one specific iEnvision set of groups. Although Envi app users cannot add or change groups or shows, they can experience the same set of display features as iEnvision, and the same set of shows within their Envi app's category. And since the Envi apps are only 99 cents, users who decide they want additional groups and features should feel comfortable "investing" in the full \$9.99 iEnvision app.

"We've received a tremendous amount of positive feedback on iEnvision," said Alan Oppenheimer, president and founder of Open Door Networks. "But we also received requests for simple ways to try the product out, often in just one category. We think the Envi apps will be a great way for people to get to know the iEnvision family."

The full line of iEnvision applications now includes:

- \* Art Envi: collections from over a hundred of the world's greatest artists
- \* Comic Envi: hundreds of comic strips and cartoons, including today's and past archives
- \* Kid Book Envi: hundreds of classic children's books for beginning through advanced readers
- \* News Envi: newspaper front pages from around the U.S. and the world, plus real-time news photos
- \* Space Envi: thousands of astronomy photographs, including the latest from Mars and Saturn
- \* iEnvision: the full app, with all the above, additional categories, and added features

Details of the full product line are available at [we-Envision](http://we-Envision.com).
