Blacksburg, VA - St. Clair Software is happy to announce the release of Default Folder X version 4.0.8, which enhances the feature set and improves compatibility in our award-winning utility for enhancing Open and Save dialogs.

About Default Folder X:

Pop-up menus let you navigate your folders and open Finder windows. Previews and Spotlight comments are there when you need them. Open, save, and get back to work: Default Folder X is workflow for the rest of us.

What's New: Version 4.0.8 now tracks folders containing the files you drag onto applications in the Dock. This release also corrects problems that users have reported with Bias Peak and QuickBooks Pro. Because these fixes may also resolve issues with other applications, we encourage all users to update to version 4.0.8.
