

Graphic Node Enhances Its iWeb Theme Range with 10 New Themes

Published on 05/27/11

Graphic Node, a graphic design company that specializes in creating themes, templates, and illustrations for Mac OS X, has updated its selection of products for Apple's iWeb with 10 additional themes. The iWeb Themes Bundle now contains 30 top-quality templates suited for various types of websites, while its price remains the same as before. The 10 newly added themes range from the warm and cozy Family Album to the bright Fantasy World to the modern and bold Calendar Days.

Sakiai, Lithuania - Graphic Node, a graphic design company that specializes in creating themes, templates, and illustrations for Mac OS X, has updated its selection of products for Apple's iWeb with 10 additional themes. The iWeb Themes Bundle now contains 30 top-quality templates suited for various types of websites, while its price remains the same as before.

Graphic Node aims to provide its clients with a comprehensive set of designs that enable them to create exceptional websites. "The iWeb Themes collection presents a great choice of unique designs for Apple's iWeb that can be customized with ease," says Jolita Unguvaitiene, Graphic Node's general manager. "After the latest update, buyers of the full bundle will receive 30 outstanding themes for less than \$2 (USD) each."

The 10 newly added themes range from the warm and cozy Family Album to the bright Fantasy World to the modern and bold Calendar Days. The set also includes a number of business-oriented themes with more understated styling, such as Plain View and Transparent.

Each theme features all the customization capabilities that Apple's renowned Web site creation program supports. Thus, Graphic Node customers can not only make the best use of the good-looking designs at their disposal but also turn them into something of their own. They can type text and drag images or movie files onto media placeholders, resize and rotate photos, or change background colors. Each theme contains 8 page variations such as Home, Album, and About Me.

Users can view samples of the themes and purchase iWeb Themes on the Graphic Node website.

After the product is downloaded and installed on a computer, the new themes will automatically appear in Themes Chooser.

System Requirements:

* Apple iWeb 2.0 or later

Pricing and Availability:

iWeb Themes Bundle is only \$49.00 (USD). Each theme is \$12.99 (USD) if purchased separately.
