

Speed Download 5.0.6 delivers many performance improvements

Published on 08/29/08

Yazsoft is proud to announce the immediate availability of Speed Download 5.0.6. Overhauled from top to bottom, Speed Download 5 redefines the Mac OS X download manager by combining four amazing products - a turbo-charged download manager with auto-resuming downloads, a fully featured secure FTP client, a file sharing utility with full encryption, and complete .Mac/iDisk/WEBDAV connectivity - into one small and easy to use application. And now with RSS newsreader integration.

Chicago, Illinois - Yazsoft is proud to announce the immediate availability of Speed Download 5.0.6. Developed exclusively for Mac OS X, Speed Download is an easy to use, powerful and reliable download manager.

Speed Download sets a higher standard for download manager innovation, and is expressly designed to be a central, unified hub for almost all downloading and file transfer activities.

This new update continues to enhance and tweak the performance of Speed Download to ensure utmost reliability. Version 5.0.6 includes tons of key improvements, and is a recommended update for all Speed Download 5 users.

Some Key New Features in Version 5.0.6:
