

Exclusion Filters Now Available in the Public Edition of SunFlower

Published on 09/03/08

Allusions is proud to announce the immediate availability the public edition of SunFlower 0.5. SunFlower is a visual monitoring tool primarily used for monitoring web page changes. Dynamic content, such as advertisements, can easily be ignored with the straightforward exclusion filter interface. Exclusion filters are easily created by clicking and dragging over the content you wish to ignore. Upgrading to version 0.5 is recommended for all SunFlower users.

Halifax, Nova Scotia - Allusions is proud to announce the immediate availability for the public edition of SunFlower 0.5; a visual monitoring tool. The SunFlower 0.5 update of the public edition adds exclusion filters for filtering dynamic content. An exclusion filter can be used for ignoring dynamic content such as an advertisement, allowing you to determine if actual content has changed. Exclusion filters are easily created by clicking and dragging over the content you wish to ignore. Upgrading to version 0.5 is recommended for all SunFlower users.

SunFlower is a visual monitoring tool primarily used for monitoring web page changes. It displays content changes and provides mechanisms to examine differences. Dynamic content, such as advertisements, can easily be ignored with the straightforward exclusion filter interface.

System Requirements:

* Mac OS X Version 10.5 Leopard
