

## **Global Delight Releases Web2 Delight 1.5 with 25 New Features**

Published on 09/05/08

Global Delight releases major update to their must-have utility Web2 Delight for transferring videos and photos from the Internet to Mac, iPods and iPhones. This release includes new feature additions, several UI tweaks and enhancements on the existing feature set.

New Udupi, India - Global Delight releases major update to their must-have utility Web2 Delight for transferring videos and photos from the Internet to Mac, iPods and iPhones. This release includes new feature additions, several UI tweaks and enhancements on the existing feature set.

"Over 60,000 downloads has helped us analyze the way people use their videos and photos on their iPods/iPhones/Mac and we have refined the tool to suit users' needs", said Rohith Bhat, CEO of Global Delight. "This release includes more than 25 new features and other improvements, which will make the user experience delightful with this must have utility".

What's new in this release:

New features have been added based on the customer demand, which include adding a new video site, retaining original FLV videos and an export option to AVI, MOV and 3GP formats, downloading videos using URLs and including the ability to download H.264 videos if available, more sorting options for searching the videos/ photos, such as newly added to the site, date, rating.

The list extends with an effort towards making the application more user friendly by providing rubber band selection, zoom control for resizing the thumbnails, option to start the slideshow from the full screen mode, a Medley to view all the downloadable videos/ photos in a single location, creating a Favorites collection with drag and drop features and many more.

Pricing and Availability:

Web2 Delight v1.5 is available for immediate download from the Global Delight website. It is a free update for the existing users of version 1.1 and is available at the same low price of \$19.95 USD for new customers. Web2 Delight requires Mac OS X version 10.4.9 or later, and is designed to run on any Intel-based or PowerPC G4/G5 based Mac running above 1.25 GHz and iPhoto v6.0.6, iTunes v7.2 and QuickTime v7.2.
