

FireCraft Independence Day Update

Published on 06/30/11

games2be GmbH today announces FireCraft 1.4, an update to their real firework simulator on iOS. FireCraft is all about building your own firework rockets and giving amazing firework-shows. Players can fill an empty rocket with various bullets, with every bullet having a specific behavior. There are bullets for thrust and others for sparkles, glitter or various explosions, and available in ten different colors. When a Rocket is built, it can be tested and be saved for firework shows.

Berikon, Switzerland - games2be GmbH today is pleased to announce the release and immediate availability of FireCraft, their real firework simulator on iOS. FireCraft is all about building your own firework rockets and giving amazing Firework-Shows. FireCraft is available for the iPhone/iPad and can also be played for free online.

To create rockets is simple. The player can fill an empty rocket with various "bullets". Every bullet has a specific behavior. There are bullets for the thrust and others for sparkles, glitter or various explosions. The bullets are also available in ten different colors. The interesting thing about this system is, that the player has countless possibilities to combine the bullets and can thus create individual rockets.

When a Rocket is built, it can be tested and be saved for firework shows. When giving a shows, all the saved rockets can be launched to delight the audience and the player gets rewarded with cash. The cash can be used to buy new bullets, bigger rockets and new locations for shows.

Features:

- * 59 different firework-bullets
- * Each bullet is available in 10 different colors
- * 24 unique locations for your firework shows
- * Countless possibilities for creating your own firework rocket
- * Every single explosion is unique
