

SoundGrid Live! released for iPhone, iPod touch and iPad

Published on 07/01/11

Independent developer Vitaliy Pronkin has released SoundGrid Live! 1.0 for iPhone, iPod touch and iPad. SoundGrid Live! is a new application in the SoundGrid family. SoundGrid Live! is a powerful yet easy to use Tenori-on-like matrix sequencer. SoundGrid Live! is based on the popular SoundGrid matrix sequencer application but improves on it in many ways and specifically focused on live performances. Changes include support for more layers and blocks and more performance modes.

Moscow, Russia - Vitaliy Pronkin is happy to announce the immediate availability of SoundGrid Live! 1.0 for iPhone, iPod touch and iPad. SoundGrid Live! is powerful yet easy to use Tenori-on-like matrix sequencer suitable for professional musicians as well as for casual entertainment.

SoundGrid Live! is based on popular SoundGrid matrix sequencer application but improves it in many ways and specifically focused on live performances. Changes include support for more layers and blocks, more performance modes, full support for musical scales, easier creation of additional voices, unified asset manager and many more.

Main Features:

9 layers, 16 blocks, 6 performance modes, 3 audio effects:

- * Program modes: Sequence, Bounce, Queue
- * Manual modes: Touch, Repeat, Hold
- * Effects: Amp Envelope, Delay and Lowpass/Highpass/Bandpass/Notch resonant filter
- * Each layer may have its own speed multiplier and set of effects

Unified asset manager to store and reuse various parts of your projects:

- * Save and load entire grids, layers (parameters and patterns may be loaded separately) and single patterns
- * All assets may be exported/imported via web interface

Various voices:

- * More than 20 high-quality voices available for download for free
 - * Super-easy installation of additional samples in any iOS-supported file format and of any length
 - * Any ZIP archive with samples may be used as voice, eg. sample packs from freesound.org (see video)
 - * Musical scale and octave selectors for layers with pitched instruments
 - * Special Scales.txt editable via iTunes file sharing to define your own musical scales
- High-quality fast audio engine
- * Unlimited polyphony with all effects turned on (on iPhone 4, older devices have lower limits)
 - * Support for background audio playback and for mixing with background audio from other applications

Audio recording:

- * Record performance to uncompressed WAV format
- * Directly upload to SoundCloud, send via email or download using web interface
- * Copy audio to for use in any other AudioCopy/AudioPaste compatible applications

Please note that SoundGrid Live! and SoundGrid are separate applications and both of them will be further developed and supported, and many new features from SoundGrid Live! will be added to original SoundGrid too.
