

## Arten Science releases ScreenAudit for Mac OS X

Published on 09/09/08

Arten Science is proud to announce ScreenAudit. ScreenAudit is a Mac OS X application that performs snapshots of your Screen(s) and Webcam at timed intervals. If you have multiple monitors it will take snapshots of them all. The interval between snapshots, the name of the destination folder, and the quality of the resulting jpg can be set from within the Preferences menu. See what you did, and when, with ScreenAudit.

Derbyshire, UK - Arten Science is proud to announce ScreenAudit. ScreenAudit is a Mac OS X application that performs snapshots of your Screen(s) and Webcam at timed intervals. If you have multiple monitors it will take snapshots of them all. The interval between snapshots, the name of the destination folder, and the quality of the resulting jpg can be set from within the Preferences menu. See what you did, and when, with ScreenAudit. You can hide the Countdown and even get ScreenAudit to speak your own message as it takes the screenshot.

S  
window which shows a countdown until the next timed snapshot. The window flips from right  
t  
graphic to let you know a snapshot has been taken. If you do not wish to view the  
ScreenAudit window it can of course be minimised. ScreenAudit will even snapshot the  
screen showing the Dashboard or Spaces overview if displayed.

- \* Snapshots of your screen and webcam at definable timed intervals
- \* Reminds you what you were doing, and when
- \* Never forget to bill for your time, your actions recorded
- \* Monitor if someone else uses your computer, and for what
- \*
- \* Monitor your home / pet / garden remotely
- \* Supports multiple monitors
- \* Speaks your own message when taking the snapshot
- \* Adjustable snapshot quality

### ScreenAudit In Use:

ScreenAudit is useful for a number of purposes. Primarily it allows you to keep a record of your activities as you use your computer. If you bill for time then ScreenAudit can be used to remind you what you were doing and when.

I  
exposed to the seedier side of the internet as they know you can monitor what they are  
doing. If you periodically check their screenshots you can be alerted to a potential  
problem before it occurs.

If you forget to save a document then ScreenAudit might come to your rescue by at least  
showing you the screen with the text displayed. You will have to type it again but at

I  
computer in your absence then ScreenAudit will help you to see what was done and who did  
it. If you manage a department you may wish to install ScreenAudit on your colleagues  
computers to keep a record of work done ?

### Minimum Requirements:

- \* Mac OS X Version 10.5 Leopard or higher
- \* Universal Binary for PowerPC and Intel
- \* G4 Processor, 1GHz or faster

prMac: Publish Once, Broadcast the World :: <http://prmac.com>

\* 5 MB Hard Drive space

**Pricing and Availability:**

A trial version of ScreenAudit is available for download. The trial version displays the W before quitting. At 5 minute intervals this equates to over an hour and a half of Screen and Webcam auditing. Obviously you can relaunch ScreenAudit to continue your trial.
