

Celmaro Releases Webbla 1.1 for Mac OS X Leopard

Published on 09/12/08

Celmaro is pleased to announce the release of Webbla 1.1, an application for Mac OS X Leopard to manage bookmarks visually. Webbla creates automatically webpage thumbnails for each bookmark and allows personalizing and organizing them with collections, smart collections and tags. Version 1.1 focuses on the integrity with different web browsers and gives the option to search and filter website content.

Mauritius, Pointe aux Canoniers - Celmaro is pleased to announce the release of Webbla 1.1, an application for Mac OS X Leopard to manage bookmarks visually. Webbla creates automatically webpage thumbnails for each added bookmark and display them in a list or grid view. Bookmarks can be personalized with tags, rating and a description, organized in collections and smart collections, and opened with different web browser.

Version 1.1 focuses on the integrity with different web browsers. Bookmarks can be added or modified directly from Camino, Firefox, Omniweb, Opera and Safari with user definable shortcuts. To open bookmarks, Webbla offers the opportunity to define scripts to give as most flexibility as possible.

Webbla also offer the new functionality to search and filter websites by contend to make it more easy to find or research websites. For system wide integration, Webbla offers Spotlight and Quick Look support to find, preview and open websites from the Finder without launching Webbla.

The automatic adjustable website change tracking system allows to check bookmark related websites on changes and marks the corresponding bookmarks as updated. Webbla imports standard HTML bookmark files from various web browser and allows to exchange bookmarks with other applications by drag and drop.

Feature Highlights in Version 1.1 include:

- * Visual Bookmarks
- * Collections and Smart-Collections
- * Tag Cloud
- * Website Change Control
- * Spotlight, Quick Look Support
- * Improved Search facilities
- * Shortcuts to add or modify bookmarks
- * Browser scripting

Minimum Requirements:

- * Mac OS X Version 10.5.0 Leopard or higher
- * Universal Binary for PowerPC and Intel
- * Internet connection, broadband recommended

Pricing and Availability:

Webbla 1.1 may be purchased for \$14.95 USD (1-User-license) and offers a limited 15 day trial period. After purchasing customers will be emailed a license file to unlock the application.
