

Mien Software Updates MediaEdit 3.0.6

Published on 09/12/08

Mien Software announced today the release of MediaEdit 3.0.6 for the Mac, a consumer-level video editing tool, which edits virtually all QuickTime readable formats and supports multiple layers. Designed specifically for moviemakers, amateur photographers and new creative artists, MediaEdit 3 can edit virtually all QuickTime compatible formats. This update improves the timeline and adds audio scrubbing.

Chico, California - Mien Software announced today the release of MediaEdit 3.0.1 for the Mac, a consumer-level video editing tool, which edits virtually all QuickTime readable formats and supports multiple layers. This update improves the timeline and adds audio scrubbing.

The free update adds the following:

- * Added audio scrubbing by holding the option key
- * Improved timeline GUI
- * Improved stability

About MediaEdit 3:

MediaEdit 3 supports unlimited media layers, comes with standard filters and transitions, and edits more than just DV. It can edit virtually all QuickTime compatible formats (.mov, .avi, .mp4, .dv, etc).

Designed specifically for moviemakers, amateur photographers and new creative artists, MediaEdit 3 will show you the world of movie magic and help create professional looking, impressive movie projects.

Key Features:

- * Supports virtually all QuickTime compatible files
- * Unlimited media layers
- * Add video, audio and text instantly
- * Non-destructive editing
- * Multiple levels of undo
- * Live previews and background rendering
- * Capture video and audio
- * Powerful yet easy-to-use timeline
- * Resize and position clip display region
- * Comes with standard effects, filters and transitions
- * Video composition: chroma keying, matte, hard light, etc.
- * Export to QuickTime, DV, MPEG-4 and to the web
- * Add chapter markers
- * Create slideshows
