

Daniel Schwill celebrates Second Anniversary of Tables for Mac OS

Published on 09/13/08

Daniel Schwill today announced the second anniversary of Tables - the easy way to spreadsheets on Mac OS X. Tables enables you to organise and present data very simply and offers extensive options to format the data. To celebrate the 2nd anniversary of Tables, purchasers can receive 25% off when they purchase a Tables licence from September 15 till September 28.

Castrop-Rauxel, Germany - Daniel Schwill today announced the celebration of the 2nd anniversary of Tables - the easy way to spreadsheets on Mac OS X. To celebrate the 2nd anniversary of Tables purchasers can receive 25% off by using the coupon code "anniversary" when they purchase a Tables licence from September 15 till September 28. For more information visit the Tables website.

Tables enables you to organise and present data very simply. With Tables you can not only organise data but also do calculations and comparisons with it. Add, sum or multiply numbers or process data by using more than 100 functions. Data can not only represent numbers but a date or an amount, too.

Tables offers extensive options to format the data. Format them as an amount, as percentage rate, scientifically or with different date formats. Create visually attractive invoices, lists or reports and even add some photos, PDF documents or charts to present your data with great visual impact.

The upcoming Tables 1.5 will add additional formatting options as well as an OpenDocument format (ODF) exporter. Tables 1.5 will be available as a free update for all registered customers. Tables requires Mac OS X "Tiger" version 10.4 and is available for download now. Tables offers a full functional free 30-day trial. A licence can be purchased from the reseller share-it! for 29 EUR (approximately \$42 USD).
