

Announcing Exibia 1.3: Video Scheduling Software for Mac OS X

Published on 09/15/08

Plyxim, LLC. is proud to announce the release of Exibia 1.3, their broadcast scheduling application for Mac OS X. Exibia allows clients in a multi-user, multi-platform environment to upload and schedule QuickTime-compatible videos to a centrally-located server. Version 1.3 includes a brand new web client optimized for iPhone and iPod touch. It is a free update for current Exibia users.

Raleigh, NC - Plyxim, LLC. is proud to announce the release of Exibia 1.3, their broadcast scheduling application for Mac OS X. Exibia allows clients in a multi-user, multi-platform environment to upload and schedule QuickTime-compatible videos to a centrally-located server.

The Exibia Server, connected to a closed-circuit television system for broadcast, handles the scheduling and playback of the video content. Users of any platform can easily upload and schedule videos for playback using their web browser. Version 1.3 includes a brand new web client optimized for iPhone and iPod touch. It is a free update for current Exibia users.

System Requirements:

Exibia Server is a universal binary that will run on any Macintosh computer capable of running Mac OS X 10.4.2 or greater with an available video output. A G4, G5 or Intel processor is recommended. A large hard drive is recommended for video storage. Many current Exibia users run Exibia Server on a Mac mini.

Pricing and Availability:

\$499 USD per Exibia Server License. One license allows Exibia Server to run on a single Macintosh computer with unlimited Exibia Client and Exibia Web Client use. Exibia v1.3 is available today. A time-limited, fully-functional demo is available for download their website.
