

PDF Bee receives major update in v4

Published on 07/19/11

Chris Paveglio today announces PDF Bee 4.0, an update to his popular InDesign automation tool for Mac OS X. PDF Bee allows users to automatically drop InDesign files and packaged folders into a watched folder for automated output. PDF Bee outputs each page of the InDesign document as a separate PDF, and now JPG/EPS. Compatible with OS X 10.6 and up, version 4.0 includes a host of new features, including JPG/EPS output, as well as output of a 2nd PDF using different settings, and much more.

Manheim, Pennsylvania - Chris Paveglio today is pleased to announce the release of PDF Bee 4.0. PDF Bee allows users to automatically drop InDesign files and packaged folders into a watched folder for automated output. PDF Bee outputs each page of the InDesign document as a separate PDF (either via PDF Export or Postscript and Distill), and now JPG/EPS.

Version 4 includes the ability to handle packaged files, to output a 2nd version of the PDFs using a different setting, to output the document as 1 PDF (instead of each page as a PDF), the option to output a JPG and/or EPS file of each page, to update image links, to separate the files into folders based on file types.

Feature highlights:

- * Watches a hot folder for files dropped locally or over a network
- * Option to process 1 file locally at a time
- * Watches for InDesign documents and package folders
- * Outputs 1 PDF per page of the document
- * Output PDF via InDesign Export, Postscript and Distill, or only Postscript files
- * Option to output a JPG and/or EPS of each page
- * Automatically load fonts for each document
- * Option to move files to a user specified location, such as another hot folder for other processes like Pitstop server or other Automator actions or scripts
- * Option to sort files into sub folders based on the file types
- * Option for reversing the file page naming (ie page number first then document name)
- * Creates a log file on network volumes to monitor multiple PDF Bees
- * Can use multiple PDF Bees to watch 1 folder for processing a huge number of files in parallel
- * Designed by a Prepress professional

Minimum requirements:

- * Mac OS X 10.6
- * Adobe InDesign CS4, CS5
- * Adobe Acrobat Distiller 8, 9

Pricing and Availability:

PDF Bee 4.0 is available immediately, priced at \$95 (US), upgrade from version 3.x for \$50 (US).
