The Big Mean Folder Machine 1.4.5 adds new folder creation options

Published on 09/23/08

The latest release of "The Big Mean Folder Machine" adds new folder creation options. The Big Mean Folder Machine is an essential tool for anyone who works with large file collections, including digital photographers, content creation, post-production, system administrators, and other creative professionals. Easily merge files from several folders into a single folder, or split files into several folders according to a wide variety of criteria.

Luxembourg City, Luxembourg - publicspace.net is pleased to announce the immediate availability of The Big Mean Folder Machine 1.4.5, their easy to use file/folder management utility.

This latest release adds several new folder creation options.

With a familiar assistant-styled interface, The Big Mean Folder Machine is an essential tool for anyone who works with large file collections, including digital photographers, content creation, post-production, system administrators, and other creative professionals.

Featuring an industrial-strength copying engine, The Big Mean Folder Machine brings structure and organization by walking the user through each decision. All operations may be performed without worrying about file name collisions; BMFM resolves name conflicts automatically. Unify entire file collections from various locations into a single folder. Or alternatively, split files into several folders based on a range of criteria.

Usage Scenarios:
* Splitting large file collections into 4Gb "chunks" for backup onto DVD.
* Splitting a photo collection into multi-level folder hierarchies by file type.
* Splitting music collections by artist and album.
* Splitting the User Documents folder into one subfolder per file type.
* Merging several file collections into one.

Features:
* Easy-to-use Assistant Style interface walks the user through each decision.
* Industrial-strength, database-backed, copying engine.
* Full preview before anything is done.
* Multiple folder naming schemes.
* Automatically resolves file name conflicts.
* Comprehensive EXIF time stamp reading support.
* Support for reading id3 tags in mp3, m4p, m4a and m4b music files

System Requirements:
* Mac OS X 10.4 Tiger or Mac OS X 10.5 Leopard
* Universal Binary for PowerPC and Intel
* 1.2 MB Hard Drive space

Pricing and Availability:
Single User Licenses for The Big Mean Folder Machine may be purchased for $14.95 USD. Small Business, Family, Business and Enterprise licenses are also available.
