

## **rubiTrack 1.0 - GPS Enabled Activity Tracking For The Mac**

Published on 09/30/08

toolsfactory software has announced the release of rubiTrack 1.0, a GPS enabled activity tracking software for the Mac. Utilizing latest Mac UI technologies, rubiTrack lets you display, analyze and organize your outdoor activities. rubiTrack is for runners, bikers, walkers, hikers, skiers and everyone else who logs GPS data. rubiTrack reads tracks from GPS enabled fitness devices like the Garmin Forerunner, Garmin Edge and compatible devices.

Carson City, NV - toolsfactory software announces the release of rubiTrack, a GPS enabled activity tracking software for the Mac. Utilizing latest Mac UI technologies, rubiTrack lets you display, analyze and organize your runs, bike rides, walks, hikes, skiing tours and all other outdoor activities.

rubiTrack reads tracks from GPS enabled fitness devices like the Garmin Forerunner, Garmin Edge and compatible devices. rubiTrack also imports activities stored as GPX and TCX files. Activities are easily accessible through dynamic activity groups which automatically categorize by activity type, location, route, date, distance and workout duration.

rubiTrack comes with visual chart and track features that let you analyze workouts quickly yet thoroughly. You can select areas in the track and view instant statistics. You can set custom markers, measure from any point on the track or split you select using the mouse.

### Main Features:

- \* Activity collection with instant track preview
- \* Activity calendar and list
- \* Direct sync with GPS Devices and GPX file import
- \* Interactive maps and charts with instant statistics
- \* Intelligent adaptive filtering
- \* Activity comparison
- \* Uses GPS data as well as heart rate, cadence and power fitness data
- \* GPX export for track sharing and uploading
- \* Athlete history
- \* Workout summary for weekly, monthly and yearly statistics

### Language support:

rubiTrack is fully localized in English, French and German

### Minimum Requirements:

- \* Mac OS X Version 10.5 Leopard or higher
- \* Universal Binary for PowerPC and Intel
