

New iPad 2 Security Base - Ideal For Retail and Business Applications

Published on 08/12/11

newPCgadgets is pleased to introduce their new Security Base to their existing line of iPad 2 Display Docks. The Security Base is ideal for applications like point of purchase displays, trade shows, and other public venues where theft is a concern. This new Security Base is a beefed up version of their original Display Dock and includes additional features to secure both the iPad 2 and the base. Constructed from a solid 1 1/4" clear acrylic the security base weighs close to the three pounds.

San Diego, California - Riding the success of their very popular line of iPad 2 Display Docks, newPCgadgets has just launched their new Security Base for retail and other display environments where theft is a concern.

This new Security Base is a beefed up version of their original Display Dock and includes additional features to secure both the iPad 2 and the acrylic base. This product is ideal for applications like point of purchase displays, trade shows, and other public venues.

Constructed from a solid 1 1/4" clear acrylic the security base weighs close to the three pounds. Just like in the Apple Store, the Security Base can be secured to a table or counter with heavy duty 3M pressure sensitive adhesive. The Base also comes with screw holes as an additional option for securing.

To secure the iPad 2 newPCgadgets has designed acrylic brackets that attach to the top of the Base. The brackets are secured with tamper-proof screws and can only be removed with the included torx screw driver. Depending on your preference the brackets can be positioned to prevent or allow access to on/off button.

The new Security Display Base meets the needs of businesses that are concerned about theft but also are looking for an attractive base to display the iPad 2. Pricing starts at \$89.95. Contact newPCgadgets for your specific needs.
