

iTunes Controller Playwatch now 50% cheaper

Published on 10/01/08

Playwatch, a popular iTunes controller among Macintosh users, is now available for almost half the price as before. With this reduction AQUARIUS software is reacting to user complains about pricing. Playwatch is a popular very unobtrusive, yet powerful controller for iTunes. It sits on the menu bar, providing artist, album and other iTunes information as a ticker. The reduced price is valid during October '08.

Cologne, Germany - AQUARIUS software has cut the price for its software Playwatch by almost 50%. The full version is now only \$6.99 instead of \$13.20. The reduction is valid during October 2008. Playwatch is a popular very unobtrusive, yet powerful controller for iTunes. It sits on the menu bar, providing artist, album and other iTunes information as a ticker.

Buttons next to the ticker provide remote control over iTunes. Cover-Art and lyrics are displayed on demand. Playwatch is especially interesting while listening to Internet-Radio: See immediately what's playing just from the corner of the eye. Change of Cover-Art is provided with smooth, unique transition effects that are a pleasure to watch. Cover-Art can be placed anywhere on the desktop even on different screens.

System Requirements:

- * Mac OS X 10.5 (10.5.2 or higher recommended)
- * PowerPC G4, G5 or Intel Processor
- * iTunes 7.4 or higher

Pricing and Availability:

Playwatch 1.2 is a free upgrade to registered users. New Users may purchase the software during October 2008 for \$6.99 USD (else: \$13.20) directly from the AQUARIUS software website. New users can also download a free, fully functional 30-day demo from the website.
