

Automated Workflows releases over 100 New Leopard Automator Actions

Published on 10/06/08

Automated Workflows, LLC is pleased to announce the release of over 100 new Automator Actions for FileMaker Pro, Adobe Illustrator, Adobe InDesign, Adobe Photoshop, Mac OS X Mail, QuarkXPress, Safari, and more! In addition, a major overhaul to existing Automator actions adds dozens of new features and options. The newly released Automator actions and action upgrades are compatible with Mac OS X 10.5 Leopard.

Phoenixville, Pennsylvania - Automated Workflows, LLC is pleased to announce the release of over 100 new Automator Actions for FileMaker Pro, Adobe Illustrator, Adobe InDesign, Adobe Photoshop, Mac OS X Mail, QuarkXPress, Safari, and more! In addition, a major overhaul to existing Automator actions adds dozens of new features and options. The newly released Automator actions and action upgrades are compatible with Mac OS X 10.5 Leopard.

- * A total of 160 actions allow users to extend the capabilities of Automator in Mac OS X Leopard like never before.
- * Over 100 new actions have been released, including, by popular request, actions for FileMaker Pro, Adobe Illustrator, Mail, Safari, and more.
- * Dozens of new features, options, and bug fixes have been implemented in existing actions.
- * Many actions now include support for Automator's variables in Leopard.
- * Action installation has been streamlined and improved.
- * Action packs now have the ability to automatically check for updates.

Automated Workflows, LLC's Automator actions for Leopard are available in application-specific packs. Trial versions of all action packs are available for download and evaluation from the Automated Workflows, LLC website.

- * Ultimate Productivity Automator Action Pack - This action pack includes a complete set of all of Automated Workflows, LLC's 160 Automator actions.
- * Automator Extension Action Pack - This action pack includes 20 actions for use with the Mac OS X Finder, Mail, Safari, the operating system, and more.
- * FileMaker Pro Action Pack - This action pack extends the power of Automator in Leopard with 10 actions for use with FileMaker Pro.
- * Finder Action Pack - This action pack extends the power of Automator in Leopard with 20 actions for use with the Mac OS X Finder.
- * Illustrator Action Pack - This BRAND NEW action pack extends the power of Automator in Leopard with 20 actions for use with Adobe Illustrator.
- * InDesign Action Pack - This action pack extends the power of Automator in Leopard with 20 actions for use with Adobe InDesign.
- * Photoshop Action Pack - This action pack extends the power of Automator in Leopard with 30 actions for use with Adobe Photoshop.
- * QuarkXPress Action Pack - This action pack extends the power of Automator in Leopard with 20 actions for use with QuarkXPress.
- * Text Edit Action Pack - This action pack extends the power of Automator in Leopard with 20 actions for performing text manipulation functions in Mac OS X.

About Automator:

Automator is an application that brings the power of workflow automation to the user level, with no programming required! Workflows are designed and constructed by users, by piecing together actions in a sequence, to create an assembly line of automated tasks. Once constructed, workflows may be saved and triggered in a variety of ways. With the release of these new and updated actions, Automated Workflows, LLC provides users with the ability to extend the power of Automator with actions that interact directly with their favorite creative applications.
