

app4mac releases Sequence 1.1 for Mac OS X Leopard

Published on 10/03/08

app4mac has released version 1.1 of Sequence for Mac OS X Leopard. Sequence is a simple and cool way to capture the content of your screen. A video or screenshot can be emailed, uploaded on the web, or passed around however you want. Using multithreaded code and a 64-bit enabled compression system, Sequence can handle capturing DVD, audio, or any other multimedia application.

Los Angeles, CA - app4mac has released version 1.1 of Sequence for Mac OS X Leopard. Sequence is a simple and cool way to capture the content of your screen. Need to explain a complicated computer function? Sequence is the answer.

A video or screenshot can be emailed, uploaded on the web, or passed around however you want. Using a multithreaded code and a 64-bit enabled compression system, Sequence can handle capturing DVD, audio, or any other multimedia application. Sequence is powerful enough to simultaneously record from your webcam and your screen. With the voice recording function, you can easily describe what you are doing on your screen. Simply use your Mac's built-in microphone or any external audio source.

With Sequence, its easy to make training videos, product demos, create tutorials, archive streaming video, the possibilities are endless. For instance, you could easily help your friends and family learn more about their computers. No need for boring and complicated documentation. With Sequence you can give clear and precise explanations, including mouse movements and keyboard entries.

Sequence supports saving screenshots as bmp, pict, gif, jpg, png, tiff. Sequence was built for Mac OS X Leopard, using the best of Mac OS X technologies: Core Animation, QuickLook, Quartz, Core Image, iChat Theater, etc.

What's new with version 1.1

- * Sequence is now able to record the sound coming from your Mac
- * Better performance
- * Updated User Interface
- * Documentation Integrated

Top 10 Features:

- * Uses a very simple and elegant user interface designed for beginners and professionals
- * Gives you the ability to create screenshots or movies of your Mac's screen in real time
- * Allows you to choose from three modes: screen, free selection or fixed area (in pixels)
- * Allows you to add doodles directly onto screenshots or videos
- * Can record a video from your webcam at the same time as your screen
- * Option to record your microphone (so you can easily describe what you are doing)
- * Copy screenshots directly onto the clipboard (option to save the file to any folder)
- * Use hot keys to take screenshots or videos more easily
- * Share your screenshot or video with friends using iChat Theater technology
- * Built for Mac OS X Leopard only
