

1Password Makes Syncing Painless and Free

Published on 10/08/08

Agile Web Solutions today announced the release of 1Password 2.9, which makes it simple to keep passwords in sync across all your Macs. Before this release, this was only possible using MobileMe. Now, many additional sync options are available. This update is free to all paid 1Password customers. 1Password is the most popular password manager for Mac OS X and iPhone.

Toronto (Ontario, Canada) - Agile Web Solutions today announced the release of 1Password 2.9, which makes it simple to keep passwords in sync across all your Macs. Before this release, this was only possible using MobileMe. Now, many additional sync options are available. This update is free to all paid 1Password customers.

What is 1Password?

- * The most popular password manager for Mac OS X and iPhone (according to MacUpdate, VersionTracker and iUseThis ratings).
- * Makes your Mac passwords available on iPhone and iPod touch.
- * A Macworld magazine "Mac Gem", rated 4.5/5 mice and nominated for a Macworld Readers' Choice Award.
- * The only password manager with integrated anti-phishing technology.
- * An automatic form filler with support for credit cards and multiple identities.
- * A highly secure database to keep track of logins, secure notes, identities, credit cards, bank accounts, and software registration information.

System Requirements:

- * Mac OS X 10.4 (Tiger) or 10.5 (Leopard)

Pricing and Availability:

A Single User license is available for \$39.95 (USD) and a five user Family License for \$59.95 (USD). A fully functional 30-day trial version is available, along with a free version limited to 20 items. Special media licenses are available for members of the press and the blogging community upon request.
