

AppZapp HD for iPad limited time for free on the App Store

Published on 09/07/11

To celebrate the No.1 ranking in News on the US AppStore from AppZapp for iPhone, ConIT AG has announced that for a limited time, AppZapp HD is now for free on the AppStore. AppZapp actively points you towards new Apps in the App Store, compels Top-Lists and highlights Apps that have just been reduced in price or offered for free. Keep track of your favourite Apps and seller with the help of the price, news and update alerts.

Basel, Switzerland - ConIT AG today announced that AppZapp HD is limited time for free. The iPad Version of the App AppZapp has been available on the AppStore. AppZapp helps App-Aficionados keep an overview over the ever-increasing Apps in the iTunes Store. The highlights of AppZapp HD for iPad are:

*** Apps and Seller-Alert with push-notification:**

Keep track of your favourite Apps and seller with the help of the Price-, News and Update Alert. You are instantly informed (via push-notification or Email) about any change of the selected App or seller - be it a price-reduction, a new version of an app or even better, the release of a brand-new app.

*** Choose from 93 App Stores:**

AppZapp is the only App that can keep you up to date on every single iTunes App Store worldwide - currently 93. Of course only if you want to.

*** The Mac App Store has been added:**

The Mac App Store has been added to the already existing iPhone- und iPad-Stores. Now you can keep track of Apple's entire App-Universe, all with the help of one app. You wont miss a single update from now on.

*** Community Live Stream:**

AppZapp assists the user to find new Apps: with the help of a specially developed algorithm the App delivers the top newcomer apps, most viewed, most liked and probably the most extensive list, the Top 400. And on top of that a live stream, needless to say, in real-time, keeps track of the actions of other users within the community. With all this you can easily find every app, even if you didn't even know you were looking for it. The individual App-descriptions, price-charts, the App's history, pictures and videos help you judge the App's quality and fit. Need more? The community can reassure your feeling with its comments and of course "likes."

If you set up a free account on AppZapp you can receive the information on price-drops and updates via push-notification (optional in App Purchase) or via Email - you won't miss a single update or price-reduction.
